Complete Theme Color System Reference

Base Colors (Defined in Theme JSON)

New Variable	Description	Dark Mode Value	Light Mode Value	Old Variable(s)
`--color-accent`	Primary accent/brand color (teal)	`#3ca0a0`	`#3ca0a0`	`--base-green`
`--color-background`	Page background	`#1a1a1b`	`#f8f9fa`	`--dark-grey` (dark only)
`--color-surface`	Cards, panels, elevated surfaces	`#252627`	`#ffffff`	`--base-grey`
`--color-text`	Primary text color	`#e4e4e7`	`#1a1a1b`	(hardcoded white/black)

Derived Colors (Auto-calculated)

New Variable	Description	Formula	Old Equivalent
`--color-surface-hover`	Surface hover state	`lighten(surface, 10%)`	`--light-grey` or `#444`
`--color-surface-active`	Surface active/pressed state	`lighten(surface, 20%)`	`#555`
`--color-surface-elevated`	Modal backgrounds, dropdowns	`lighten(surface, 5%)`	`#2a2a2a`
`--color-border`	Standard borders	`lighten(surface, 15%)`	`#444`
`--color-border-strong`	Emphasized borders	`lighten(surface, 25%)`	`#666`

New Variable	Description	Formula	Old Equivalent
`--color-text-secondary`	Secondary/muted text	`opacity(text, 0.7)`	`--light-grey`, `#999`, `#ccc`
`--color-text-muted`	Very dim text	`opacity(text, 0.5)`	`#666`
`--color-accent-hover`	Accent hover state	`darken(accent, 10%)`	(hardcoded darker teal)
`--color-accent-active`	Accent active/pressed state	`darken(accent, 20%)`	(hardcoded darkest teal)

Legacy Aliases (Added for Backward Compatibility)

Legacy Variable	Points To	Original Purpose
`--base-green`	`--color-accent`	Primary accent color (teal)
`--base-grey`	`--color-surface`	Medium gray surfaces
`--dark-grey`	`--color-background`	Dark backgrounds
`--light-grey`	`--color-text-secondary`	Lighter gray text/borders

Fixed Colors (Not Theme-Dependent)

Variable	Value	Purpose
`--color-danger`	`#ef4444`	Error states, delete buttons
`--color-danger-hover`	`#dc2626`	Danger hover state
`--color-success`	`#22c55e`	Success states, confirmations
`--color-warning`	`#f59e0b`	Warning states
`--color-info`	`#3b82f6`	Info states

Key Improvements

1. **Theme-Aware**: All colors now respond to light/dark mode toggle

2. **Semantic Naming**: Names describe purpose, not appearance
3. **Auto-Derived**: 9 colors calculated from just 4 base colors
4. **Minimal Config**: Only 4 color definitions per theme needed
5. **Backward Compatible**: Legacy aliases prevent breaking changes

Common Replacements Made

- `background: black` → `background: var(--color-background)`
- `background: #333` → `background: var(--color-surface)`
- `background: #444` → `background: var(--color-surface-hover)`
- `background: #555` → `background: var(--color-surface-active)`
- `color: var(--light-grey)` → `color: var(--color-text-secondary)`
- `border: 1px solid #444` → `border: 1px solid var(--color-border)`
